

Inter-Dimensional Photography

The 5th dimension is where Heaven exists on this earth. It is where your spirit guides are, it is where the angels are and it is where your spirit can go and be. This is where the spirits of the lights exist. Dowsing connects you to the 5th dimension and Inter-Dimensional Photography lets you see it.

Inter-Dimensional Photography is a tool for extending the understanding of humankind. It is an instrument of enlightenment, allowing those who are looking for proof of the life forces all around us, to document some of the many layers and manifestations of Spirit in this wonderful Universe.

Photos can be taken anyplace. Better responses come in nature at dusk and dawn. Always with a flash. Even those taken during daylight should use a flash. Go to the place in nature that feels sacred and/or spiritual to you. Through intent and conscious thought and verbal statements ask them to come and those that come are only for our highest good, as well as the good of your pictures. Welcome them when they do come and thank them for coming. An example, not all starships that want to come are for our highest good, so be specific in your ask.

The Astral Plane or 4th dimension is filled with chaos, so don't go there. Ask for protection in your ask. Don't go to cemeteries, beware of psychic attacks and don't attract negative energy. Orbs are not ghosts or spirits of the dead. Dark spirits don't absorb light and do not fluoresce.

Too often people have trashed photos they have taken because of spots, circles, streaks, misty gray areas, or even shafts of sunlight on a rainy day. These are dismissed as faults in the camera, lighting or the operators fault.

Orbs are light that is a way for spirit to travel. Orbs are spirit emanations, not spirits from spirits. Small orbs are of higher frequencies. Colors of orbs may vary due to the frequencies in which they belong. Red Giant Orbs may be 5 to 10 feet in diameter. Larger orbs have bumps and knobs that make them identifiable, like fingerprints. Orbs that have contrails show a shutter speed that is too slow to stop the movement.

Not everything is orbs and can be explained as such. ET's will appear as a small bright light among orbs. Starships come through portals. There are light ships as well. These are for our highest good and come to aid and assist us. The photos taken here are not Inter-dimensional but rather Inter-galactic. Fairies typically come at dusk and leave at dawn. When they come in they look like raindrops and when they leave they look like raindrops in reverse. Fairies aid animals in finding shelter before a storm. They like impressing humans with respect and reverence for nature and urge plants to grow in certain areas. They like Skittles or sprinkles scattered where you are.

Optimal places and times for the greatest chance for appearance are during the Winter Solstice, Summer Solstice and Spring and Fall Equinoxes. Any place with a waterfall a couple feet high or higher helps as well. There are certain areas that serve as portals and have a divine presence like Highbridge Falls, NJ and Sedona, AZ. My excursions to Chittenango Falls, NY and Highbridge presented wonderful experiences and pictures.

The camera flash appears to be necessary to get a picture of orbs and others even in broad daylight due to the speed of them that cannot be captured by the naked eye. It seems the flash doesn't reflect off the orbs, but causes them to fluoresce, so you may have to take several pictures as it takes time for the orbs to absorb the light so they can fluoresce it back. Then they revert back to their original state. Expensive cameras with hot mirrors that filter out near infrared light will not get or be less sensitive to orb images. Experiments with cameras a

few inches apart do not show the same thing, probably because the flash is directional. Often phone batteries may be drained at the site so bring an extra. At Chittenango my I-Pad would not function. At Highbridge my I-Pad and my wife's I-phone both died. When we left the site both resumed full power. My cell phone icons all started vibrating but eventually I was able to take some good pictures. Cameras, it appears, work best. Remember, what your capturing is what you need to see. Two people standing side by side may get completely different images.

One problem with humans accepting the presence of orbs, angels, fairies, portals, energies and spaceships is first not in religion, but in technology and politics. Other unseens we've grown accustomed to are TV and radio programs, microwaves, cell phones, nuclear radiation and weapons guidance systems. While science can deny healers, clairvoyants, and psychics and those who see apparitions, auras and chakras that others don't, **THEY CANNOT DENY PHOTOGRAPHS.** This is better for spirits to connect with us in the general public. This offers evidence as close as scientific proof as we have ever come in proving the existence of the spiritual reality; that divine presence is real. For whatever reasons they have, spirits have chosen to appear in these photos.

Orbs appear around healers. They are there to help. You must request the healing or help. Intent is extremely important in the healer and the client. A client's conscious or unconscious disbelief in the spirits ability to heal causes a conflict in the realm where the spirit operates.
